TrustGrid Systems

Responsible AI consulting and technology | Pune, Hyderabad

Response to: Meridian Financial Services (MFS) — MFS-RFP-2026-031: Enterprise AI Governance and Model Risk Platform
Submission date: 2026-10-16

1. Executive Summary

TrustGrid Systems proposes a combined platform-and-advisory engagement: the TrustGrid AI Control Tower platform plus a governance operating model designed with MFS's Risk, Compliance and Data Science teams.

2. Governance and Policy Coverage

- AI inventory, risk tiering and lifecycle stage gates from ideation to retirement.
- Policy and control library mapped to NIST AI RMF and ISO/IEC 42001, tailored during a 4-week design phase.
- Operating model: RACI, AI ethics committee charter and training for 300 staff.

3. Model Risk and Monitoring

Scheduled validation jobs measure drift, stability and performance; fairness tests run before each release. Generative AI use cases are tested with red-teaming playbooks every quarter. Real-time monitoring is provided through partner tooling.

4. Regulatory Compliance and Audit

Our regulatory team maps each use case to RBI guidance, the DPDP Act and the EU AI Act and produces audit-ready documentation packs. Every approval and change is recorded in a tamper-evident audit log. TrustGrid is ISO/IEC 27001 certified.

5. Integration and Implementation Plan

Phase	Weeks	Outcome
Design	1-4	Operating model, policies and risk tiers agreed
Configure and integrate	5-12	Control Tower live with MLflow, Databricks and ServiceNow
Pilot	13-16	20 priority models governed end to end
Scale	17-20	All 140 models and 12 GenAI use cases onboarded

6. Commercials and Support

Item	Amount (INR, excl. GST)
Advisory and implementation (fixed price)	95,00,000
Platform subscription, 3 years	1,98,00,000
Managed governance support, 3 years	36,00,000
Total three-year cost	3,29,00,000

Support is 24x7 for priority 1 issues with a 2-hour response. References: a national insurer and a payments company, both live since 2025.
