Response to: Meridian Retail Group (MRG) — MRG-RFP-2026-014: Omnichannel Customer Support Platform
Submission date: 2026-10-14

1. Summary

Quasar Solutions is interested in supporting Meridian Retail Group with a new customer support platform. We propose to configure a leading open-source help desk platform for MRG's needs.

2. Solution and Approach

We will install and configure the help desk with email and web chat channels. Other channels and integrations with SAP and Shopify can be added in later phases. We estimate an initial rollout in around 16 weeks with a team of four consultants.

3. Experience

Quasar has delivered help desk set-ups for several mid-sized companies in manufacturing and education. References will be shared at a later stage.

Note: pricing, security details and the support model will be submitted separately.
